

WHEN DEPTH MATTERS CF77 DELIVERS!

CF77 COIN FINDER

www.makrodetector.com

- Easy operation
- Deeper search
- Metal discrimination with 3 different sounds
- Excellent performance in high mineralized soils

- Ergonomic design
- Fast target detection
- Iron rejection feature
- Long battery life

CF77

COIN FINDER

EASY OPERATION & ERGONOMIC DESIGN

CF77 is a user friendly metal detector that does not tire the user in long searches thanks to its functional structure, ease of operation and ergonomic design, that saves time by eliminating extra settings and that refers to all medium and professional users.

SEARCH COILS

CF77 has 3 different light, water resistant D-D coils with 23 cm – 28 cm and 45 cm dimensions providing easy movement ability in narrow areas that penetrates in all kinds of soils. Thus, it allows you to carry out your searches without having any problem by selecting the appropriate head for rocky areas, intense mineral grounds, tillages, beaches and fields with waste metal. It also provides faster and deeper searches with the larger head in large areas.

LONG BATTERY LIFE

CF77 provides you with comfortable searches by eliminating the battery problem with 8 AA Alkaline batteries that offer the opportunity of 25-30 hours of exploration and lets you complete your exploration.

SEARCH MODES

CF77 gives you the chance of non-discrimination and maximum depth exploration in MODE 1 and eliminates the target detection difficulty that is encountered in high mineralized soils and allows you enjoyable and smooth searches by providing discrimination and stable exploration in MODE 2.

METAL DISCRIMINATION WITH 3 DIFFERENT SOUNDS

CF77 can reach incredible depths without metal discrimination; on the other hand it may prevent you from unnecessary digging by helping you discriminate the non-ferrous, gold and ferrous type metals with 3 different sounds thanks to its great metal discrimination feature.

IRON AUDIO

CF77 makes sure that you do not hear the iron sound received from the soil in high mineralized areas thanks to its iron audio on/off feature and at the same time it gives you the opportunity to detect only the non-ferrous metals by turning ferrous metal sounds off completely.

DEEPER SEARCHES & FAST TARGET DETECTION

CF77 lets you reach the depths that you can never reach with other detectors in this category with depth, determination and stable search features. With all these features, CF77 provides you with new exploration areas by detecting the undiscovered areas searched with other devices.

EXCELLENT PERFORMANCE IN HIGH MINERALIZED SOILS

CF77 lets you easily detect gold, single coins, jewelry, ruins and other tiny objects in areas you have not worked before by providing the opportunity of stable and deep search even in difficult ground conditions in contrast to many detectors.

TECHNICAL SPECIFICATIONS

Coil Type	DD Coil
Operation System	VLF
Frequency	17.5 kHz
Metal Detection	Sound
Ground Setting	Manual
Headphone Output	1/4" Mono
Handset	122 - 146 cm
Run Time	30 Hours Max.
Weight	1,050 gr

Battery and coil is excluded

SEARCH COILS

C23 Coil
(Pro Package)
23 cm (9")
465 gr

C28 Coil
(Standard Package)
28 cm (11")
560 gr

C45 Coil
(Pro Package)
39x45 cm (15x17.5")
850 gr

INBOX CONTENT

Carrier Bag

Battery Box

The device is delivered with 8 pieces of AA Alkaline batteries.
